#### **DETAILED ACTION**

#### **Drawings**

1. The drawings filed on 8-21-2003 have been approved by the examiner.

#### Claim Objections

2. Claims 10-15 objected to because of the following informalities:

As per claim 10, line 8, "applications" should be –application-- or "to a protected" should be "to protected".

All dependent claims are objected to as having the same deficiencies as the claims they from.

Appropriate action is required.

### Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-6 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The phrase "storage medium" (line 1) could represent a piece of paper with computer program code written on it, and therefore it is non-statutory.

## Allowable Subject Matter

5. Claims 7-15 are allowable over the prior art of record. Claims 10-15 are objected to as set forth above.

As per claim 7, Wolczko et al. (US 6.931,504) teaches the conversion of virtual addresses to physical addresses, but fails to teach a secure physical memory and a non-secure virtual memory. It also fails to teach the logic that converts a pointer to a virtual memory address to a pointer to a physical memory address.

As per claim 10, Johnson et al. (US 2003/0163718) teaches the mapping of virtual addresses onto actual addresses, but fails to teach replacing pointers to one or more virtual memory addresses to the one or more physical memory addresses. It also fails to teach an object that is a parameter to a protected application.
